Event Center Rooms: EC2001/EC2002

FOR

Qualified contractors interested in future infrastructure construction opportunities

TO LEARN

The members of the Grand Prairie Water Commission (currently in formation) invite contractors to receive updates and ask questions regarding the proposed Alternative Water Source Program (AWSP) planned to bring Lake Michigan water to Channahon, Crest Hill, Joliet, Minooka, Romeoville, and Shorewood. Time for 20-minute individual discussions with Program representatives can also be requested during registration. Information on local projects planned by the individual commission members will also be presented.

ABOUT THE PROGRAM

The AWSP is projected to require the construction of more than \$1 billion worth of new water supply infrastructure to bring treated Lake Michigan water from Chicago to the Commission members. The Commission work will be procured as more than 25 separate work packages including pumping station, water storage, transmission main, and delivery structure construction. Member communities will also be awarding contracts for construction of pumping, storage, and conveyance improvements needed within their own water systems. Construction on early packages is scheduled to begin in the second half of 2024, with full program completion planned for 2030.

For more information related to the Grand Prairie Water Commission, please visit our website at www.gpwc-il.org.

EVENT AGENDA
